

Laser Welding Machines

Faster and efficient welding solution developed with **32+ years of welding experience.**

**NEW
LAUNCH**

Key Highlights

Welding solutions across
15+ Industries

Experienced team of
Application Engineers

Dedicated **Mechanical & Electrical Design** center

Strong after sales
Support Across India

Applications

Automobile | Farm Equipment | Insulation in Shipbuilding | Transformer Tank Manufacturing
Heat Exchangers | Earth Moving Equipment | Power Plants | Control Panels
Electrical Panels | Elevator Panels | Cookware | Kitchenware

Superior Quality Welding, 100% Leak proof

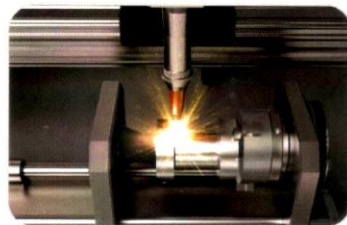

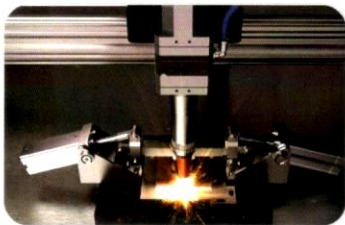

Artech's laser welding machines are perfect for both delicate and deep welding tasks. They deliver outstanding results, surpassing traditional welding.

Perfectly designed to handle different materials like stainless steel, mild steel, copper, aluminum, and more.

Thanks to our robust design and top-notch engineering, Artech can provide customised laser welding machines that match your unique requirements

Laser Welding Features

- Suitable for different types of material.
- Faster than conventional welding
- Higher welding strength
- Lower heat affected zones
- Excellent control over welding processes
- High quality clean welds

Laser Welding Advantages

Laser precision allows for better quality welds, faster throughput, reduced post-processing costs and access to new domain of applications. Laser welding can deliver heat extremely locally at the seam, without damaging the surrounding material.

Superior Quality

Better Productivity

About Artech

Artech is a specialist partner to hundreds of industries using its specialist Welding technology. One of the few companies, globally, to develop the Capacitor Discharge Welding technology, Artech comes with proven capabilities to help small and large companies from various industries to take up Capacitor Discharge and Laser Welding.

Today, Artech's machines are leading the way across several established as well as emerging industries to drive product innovations through better welding technology.

Artech Welders Private Limited

📍 No. A-24/1, H-Block, MIDC, Pimpri, Pune, Maharashtra 411 018, India.
